THE DEATH DRIVE AHEAD.

While the tide of battle now shifts back and forth, like a shuttle cock, lleme company. for his appearance before Judge Cook on the fields of France, it can not be always so. The hour of decision must at last approach, and when it comes the greatest death drive that ever scouraged a nation will sweep, like a wasteful hurricane, the Hunnish hordes from the face of the earth.

In a recont interview Gen. Foch forecast his plans for the drive of death. He said in effect that it was his purpose to hold the Huns in through the Cumberland will recheck, with the ienst possible sacrifice of men, until the American millions were marshaled behind his lines, and then to strike-strike with the force of the thunderbolt and the fury of the storm. The great French General, confident in the daily waxing of his own army and the hourly waning of the enemy's forces, widely announces his purpose to defer the master stroke, that shall mark a period in history for all ages to come, until the volume and force of his great engine of war shall be strong enough to sweep with irresistable violence the fields of France and Belgium, and on to Berlin. The cruzed Kaiser sees the gathering storm and shudders at its force, and in desperation huris to death division after division in a vain effort to brenk the ailles' lines before the fateful hour of Foch's command to advance. Let us be of good cheer. The present lines will hold until two million American soldiers are marshnied behind the lines to answer ready when the great commander, Foch, gives the order to start the avalancho of

AUSTRIANS PLAN STRIKE AGAINST WAR

Address Before Socialists Affirms Great Unrest Exists.

Washington .- An address to the Austrian proletariat, adopted at the recent Vienna congress of the Gerthat great unrest exists in the Austrian working classes and that a general strike against further continuance of the war is planned.

An official dispatch to-day from Switzerland says the government is warned by the Socialists of the consequences which will result from eonviction by the proletariat that the Central Powers intend to continue hostilities for the war-like aims of the imperial governments. On the other hand the address declares that after conscientious examination of the conditions in which the struggle may take place the coagress is confirmed in its opinion that the present moment would not be favorable for a great strike.

"The congress," continues the dispatch, "invites the Austrian working class to hold itself in readiness for the struggle at n favorable moment, which cannot fail to come."

Swiss observers see in the address and in the comments on it by the Arbeiter Zeitung the underlying influence of the government, which seeks to avoid at this critical time a general walkout with attendant internal dis-

."Besides the address," says the dispatch, "the congress in resolutions protested against the peace of lirest-Litovsk and of Bucharest; declared itself for peace without apprexation or indemnities both in regard to France, Italy, Russia, Serbia and Rumania; proclaimed the right of peoples to dispose of their affairs themselves and pronounced itself in favor of the league of nations."

> Careful analysis of the figures la regard to hogs indicates that we were five to seven million hogs short at the period when the conservation program was started with the American people. The average export of hog products per month was roughly 55 million pounds before the European war. In the last haif of the year 1917, because of the decrease in the number of hogs in the country, it fell below the somewhat increased level due to war demands. In March, 1918, we were exporting 300 million pounds per month and can see our way clear, with the present saving and production, to go lorward at this ducts which provides an ample reserve for a steady llow to meet the population.

PLANES ARE FIREPROOF.

Washington, June 8 .- A fire proof alrplane is the latst addition to Uncie Sam's aerial program.

These planes will be constructed of noninflammable materials, the wings, struts, fuseiage, etc., being made of an aiuminum alloy steel, both light and strong. The gasoilne tanks will be specially protected to prevent possible puncture by inflammable bullets.

Flights aiready have been mado with the first models.

A noninfiammable plane, it is beleved, will greatly reduce the losses of planes in action. It was the burning of his plane, rather than his own lujuries, that caused the death of Lufbery, America's premier flier, two weeks ago. Had Lufbery been flying a fireproof plane there is little doubt, it is declared, but that he could have landed safely despite the builet wound through his hand.

On June 28th Prove You Are A Loyal American

Will you greet the Fourth of July with a free conscience? Or will you spend the Fourth in shame-faced guilt? June 28th has been set as National War Savings Day. Your country expects you on that day to pledge every penny you can, up to \$1,000, toward the purchase of War Savings Stamps. The price of American citizenship is no longer cheap. A new hour has struck. The crash of war has ground all semblance of cheapness out of being American. It is now a dear-bought honor. You must pay.

On June 28th, Your Country Asks You to Balance Your Patriotic Cash Account

Every penny you withhold, that you are able to give, extends ald and comfort to the enemy.

No sordid legal summons will, for the present, compel payment. You are called to payment by the higher, more chivalric summons on June 28th your pledge to purchase this year every dollar's worth of War Savings Stamps you can buy.
